Project Overview

What is OrganicRec?

OrganicRec is a fully frontend, single-page organic grocery marketplace built with HTML, CSS (Tailwind) and vanilla JavaScript.

It helps users discover, filter, and purchase 83+ certified organic products across 7 categories — all from one intuitive dark-themed interface.

83+ Products

Across 7 organic categories

Smart Filtering

Search, sort & price range

Eco Impact

Live eco tracker in cart

📋 Product Data Structure

JS product object

```
const product = {
  id:       1,
  name:    "Organic Avocados",
  price:   249,
  emoji:   "🥑",
  cat:     "Fruits & Vegetables",
  origin: "Mexico",
  rating: 4.8,
  cal: 160, pro: 2, carb: 9, fib: 7,
  vitC: 17, mn: 10
};
```

id

Unique numeric identifier

name / emoji

Display label + visual

price / cat

INR price & category

cal / pro / carb / fib

Nutritional data (per 100g)

vitC / mn

origin / rating

Farm trace & star rating

Core Features

Live Search & Filter

Search by name/origin + price slider + sort by price — all reactive with no page reload.

Nutrition Breakdown

Per-product accordion panel showing Kcal, Protein, Carbs, Fiber, Vitamin C & Manganese bars.

Farm-to-Table Trace

Timeline showing Harvested → Quality Tested → Delivered with origin country details.

Smart Basket Builder

One-click auto-fill cart: Weekly Groceries, Protein-Rich Diet, or Budget Basket presets.

Eco Impact Tracker

Real-time display of pesticides, plastic & water saved based on organic items in cart.

3-Step Checkout

Cart Review → Shipping Details → Payment Method (COD, UPI, Card, Net Banking).

Conclusion

Project Summary

- Built a fully client-side SPA with zero frameworks or backend
- Covered all major web tech concepts: DOM manipulation, event handling, dynamic rendering
- Implemented real-world features: cart, checkout flow, nutrition data & eco tracking
- Applied responsive design using Tailwind utility classes
- Delivered a polished, production-like UI with a consistent dark organic theme
